Dear Students & Families,

Class timetables have now been finalised with your child accessing a range of educational and therapy programs. If you haven’t already done so, you should soon receive your child’s individual timetable. Many students will be accessing a number of classes and programs which are different from their classes. This ensures that your child’s program is tailored to their individual needs and goals. If you have any queries concerning your child’s program please contact your child’s teacher.

Some families may have already been approached to attend a Student Support Group Meeting (SSG). These are important meetings where you and your child’s teacher plan educational goals for the year. When thinking about your child’s goals please consider what you would like them to be able to do in adulthood and what they need to learn next to achieve this long term dream.

If you haven’t already done so, please consider getting your child registered with DHS - Disability Information and Support. This program provides you or your child access to a range of services now and into the future. To get registered you will be asked what services you require at this time. Many of our parents access supports such as respite and supporting a child’s emotions. Once registered, your child can ask for assistance through-out their life. With the National Disability Insurance Scheme (NDIS) being rolled out throughout Australia, being registered with DHS may make getting services through the NDIS quicker.
